

Published by Kendall Hunt Publishing, these books are a supplement to private, group or class voice lessons. Though I feel these books can stand alone, they are not meant as a replacement for a good teacher for ensuring student learning and understanding of music theory, history, and sight-singing.

Each book includes reviews of subjects including a review test (with answers) at the end. Composers, terms, solfege, and diction are a unique part of these books that make them especially helpful for singers.

I hope these books can be a useful addition to the many teaching tools that already serve to teach young singers in your studio or classroom.

Kendall Hunt offers both e-book and traditional book versions of all of the books. You can order them through this website, which will link you to Kendall Hunt, or by calling them at (800) 228-0810. If you are a private music instructor, you may receive a discount by letting customer service know as well!

Thank you for your interest in Music Theory for Singers!
